CONFERENCE CENTER

GILBERTSVILLE, KY

July 13 - 17, 2009

Monday - July 13th

Overview of the Kentucky OSH Program

8:30 - 11:30 a.m.

This session discusses the obligation to provide a safe and healthy workplace, free from recognized hazards. Topics of discussion include the operations of the Kentucky Occupational Safety and Health Program, including enforcement and voluntary compliance services, and safety and health topics currently being considered for future standards and policies.

KyOSH Mandated Health Programs

1:00 - 4:00 p.m.

This session takes a broad look at the basic health programs required for general industry, providing an invaluable overview for the novice and veteran safety and health professionals. The course will familiarize participants with the frequently-cited core elements of these programs and explain the requirements in plain language.

Tuesday - July 14th

Back Care and Office Ergonomics

8:30 - 11:30 a.m.

This session explains why many back injuries occur from lifting and how they may be prevented. The office ergonomics portion focuses on recognizing risk factors, reducing worker stress, and avoiding potential muscular skeletal disorders associated with everyday computer use.

Electrical Safe Work Practices

1:00 - 4:00 p.m.

This course is designed to familiarize participants with the Kentucky OSH's electrical Safety-Related Practices standards 1910.331 - 1910.335. Topics include requirements for working on de-energized and energized electrical equipment, shock and arc flash/blast hazards, personal protective equipment and other NFPA 70E requirements.

Wednesday - July 15th

Introduction to Basic Electrical Safety

8:30 - 11:30 a.m.

This session introduces its participants to basic electrical concepts and the hazards associated with them in general industry. The focus of the class is to show hazards looked for by Kentucky Occupational Safety and Health consultants while conducting safety and health audits. The course is designed to familiarize students with the CFR 1910.300 through 1910.308 OSHA electrical standards and the potential hazards associated with electrical installations and equipment. Topics include electrical hazards associated with the use of electric utilization systems, wiring design and method, wiring protection, wiring components, electrical definitions, proper examination of electric equipment, electric equipment for specific locations, and acceptable installation and use of both portable and fixed electric equipment.

Noise and Hearing Conservation

1:00 - 4:00 p.m.

This session explains the composition of sound, the instrumentation and criteria used to determine excessive noise levels, the effects of noise on the hearing mechanism, personal protective equipment, and basic noise control methodology. Also included is a discussion of the hearing conservation requirements. These requirements include employee exposure monitoring, audiometric testing, hearing protection, employee training, and related recordkeeping.

Thursday - July 16th

Spray Finishing Operations

8:30 - 11:30 a.m.

This course covers spray areas and spray booths and the application of the KY OSH Program's spray finishing regulation, 29 CFR 1910.107. The course will also include discussion of the National Fire Protection Association document, NFPA 33, the national consensus standard for spray finishing. Topics covered in this session will include design, cleaning, electrical, conveyors, piping systems, ventilation, chemical use and storage, and other hazards in and around spray areas and booths.

Excavation and Trenching

1:00 - 4:00 p.m.

This session is designed for those persons engaged in excavation work. It covers OSHA's new requirements in Subpart P of the 1926 standards. Topics include soil classification and instrumentation, shoring techniques, trench boxes, a discussion of competent person, and associated hazards.

Friday - July 17th

Construction Fall Protection

8:30 - 11:30 a.m.

This course is designed to familiarize participants with Kentucky OSH Fall Protection standards 1926.500-1926.503. Topics include requirements for employers to provide fall protection system, description/requirements of fall protection systems and training requirements.
